

Trucking Bee Test Results

July 28, 2023

Kara Ketterhagen

Agenda

1. Testing Overview
2. Test Results
 - a. CTA Placement Test
 - b. Usability Test
3. Recommendations
4. Appendix
 - a. Full Maze Results

Testing Overview

Hypothesis: Changing the placement and copy of the sign up call-to-action (CTA) in the Trucking Bee app will impact conversion for first time app users.

User Groups

- Treatment: 5 users
- Control 5 users

Test Formats

- CTA Placement Test
- Usability Test

Control

Treatment

CTA Placement Test

15-Second Test

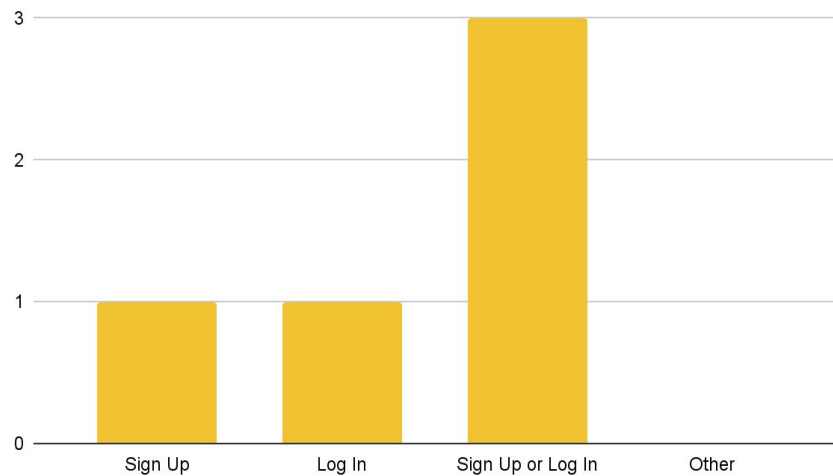

CTA Placement Test

- **Test Format:** 15-Second Test
- **Open Question 1:** What action was the app screen asking you to take?

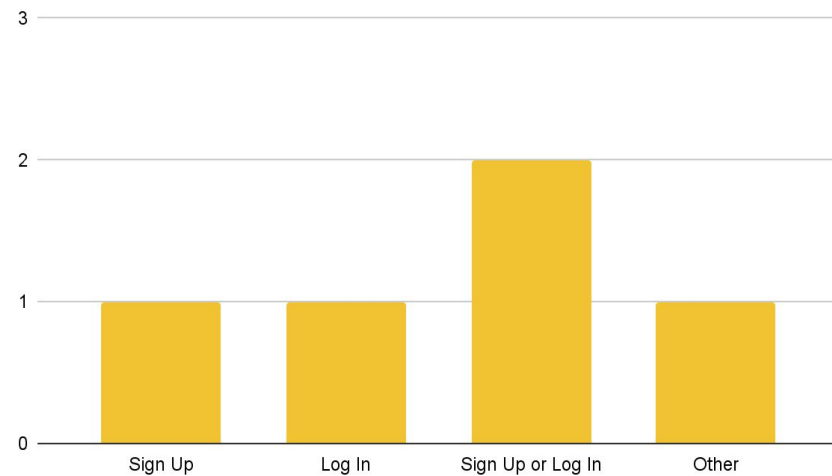

<i>Control Responses</i>	<i>Treatment Responses</i>
Log in or sign up for app	Schedule with Trucking Bee
Sign in	To sign up
Sign up or login	Log in or sign up
Make a profile	Get started or log in
To sign up or log in to see how this app could change your life.	Log in to learn more

CTA Placement Test

Control Responses

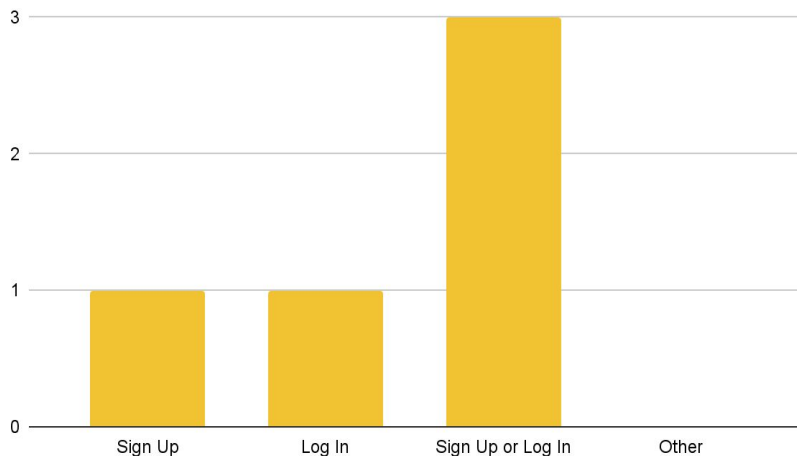

Treatment Responses

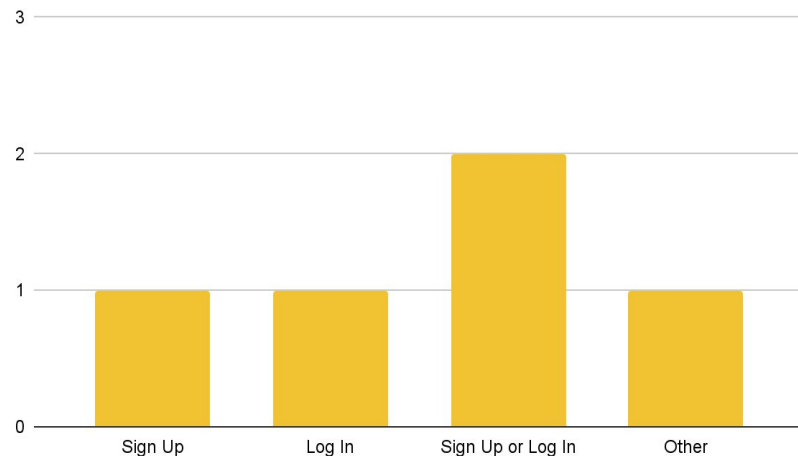

CTA Placement Test Findings

Neither design clearly signaled “sign up” more than “log in” to users.

Control Responses

Treatment Responses

CTA Placement Test

- **Test Format:** 15-Second Test
- **Open Question 1:** What was your overall impression of the app screen?

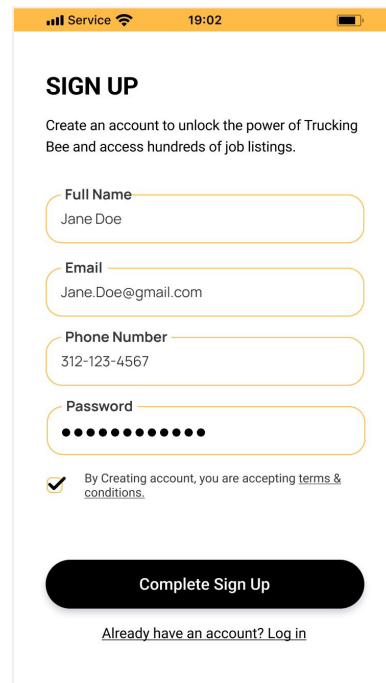

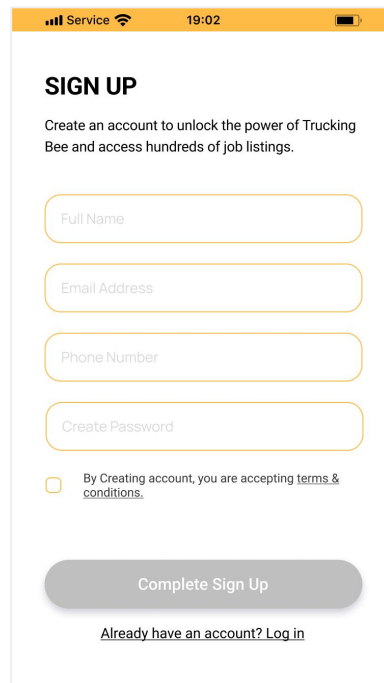

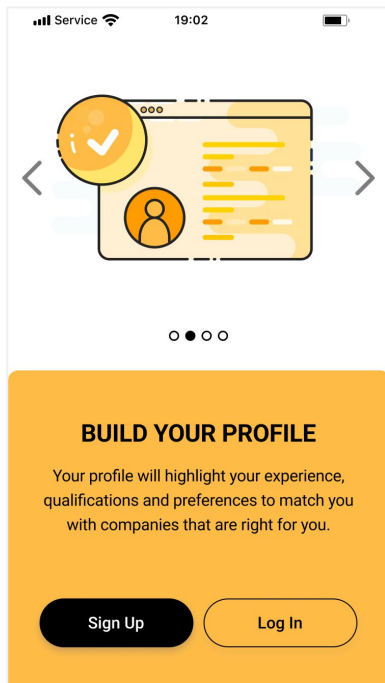

Control Responses	Treatment Responses
Very clean, thorough, and creative	Playful, interesting
Excellent	I love it
Lot it i like the app and the easy gui very straightfw	Very clear; nice graphics; understandable
Nice	Good
It was inviting, looked easy to use	Simple, direct, not engaging because the problem doesn't relate to me.

Control

The figure displays six sequential mobile app screens for a 'SIGN UP' process. Each screen features a status bar at the top with 'Service', signal strength, time '19:02', and battery level. The main heading is 'SIGN UP' followed by the text 'Create an account to unlock the power of Trucking Bee and access hundreds of job listings.' The form includes fields for 'Full Name', 'Email Address', 'Phone Number', and 'Create Password'. A checkbox with the text 'By Creating account, you are accepting terms & conditions.' is located below the password field. At the bottom, there is a 'Complete Sign Up' button and a link 'Already have an account? Log in'.

- Screen 1:** All form fields are empty.
- Screen 2:** 'Full Name' is filled with 'Jane Doe'.
- Screen 3:** 'Email' is filled with 'Jane.Doe@gmail.com'.
- Screen 4:** 'Phone Number' is filled with '312-123-4567'.
- Screen 5:** 'Create Password' is filled with '*****'.
- Screen 6:** The 'Complete Sign Up' button is highlighted in black, and the checkbox is checked.

Control Key Takeaways & Recommendations

Key Takeaways:

1. Users spend less time on each subsequent “slide” on the startup screen.
2. Most users move directly to signing up, rather than viewing additional screens.

Recommendations:

1. Keep essential, high-value information on the first screen. Don't expect every user to swipe through each screen.
2. Keep copy short, users will not spend much time on subsequent screen.
3. In the future, utilize data analysis to inform the optimal number of screens.

Control Heat Map

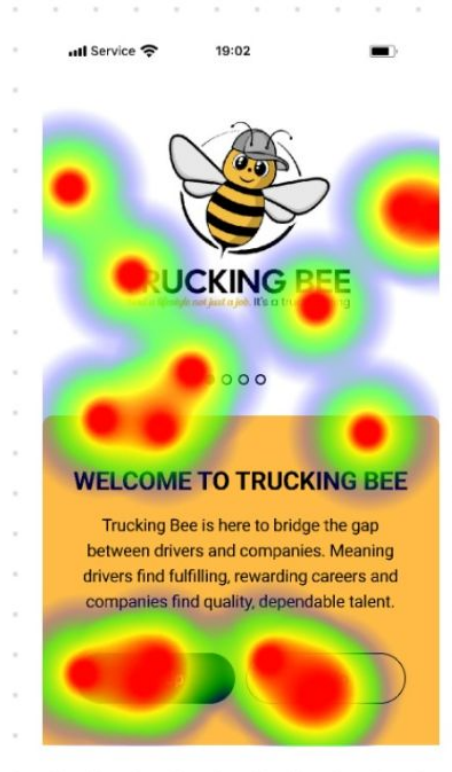

Control

Control Heat Map

Key Takeaway:

Users utilized arrows, indicator dots, and swipes/taps to navigate through slides.

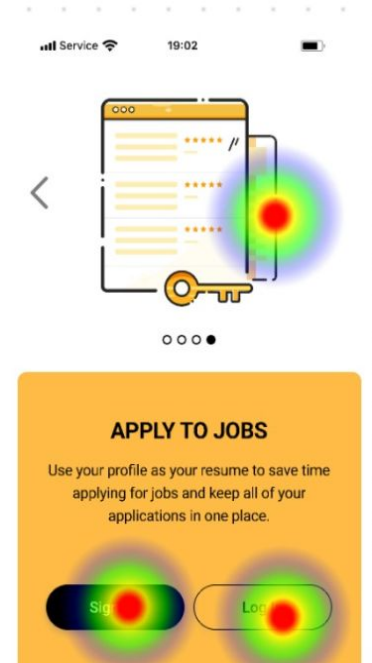

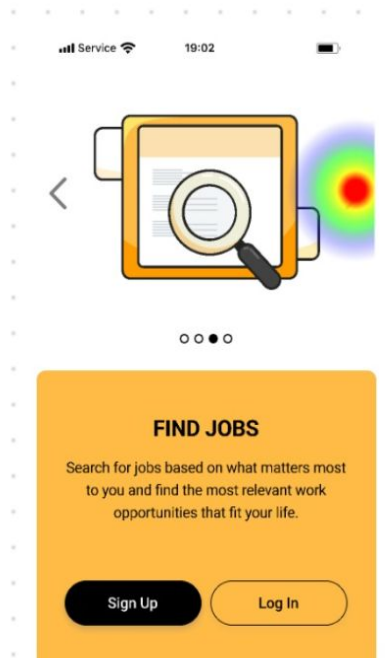

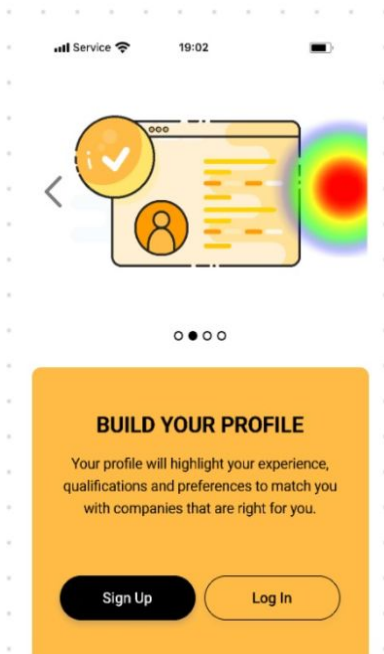

Recommendation:

Allow users to navigate through the onboarding screens in multiple ways.

Key Takeaway:

Using these metrics, Treatment appears to be the design of choice. However, due to the small sample size and lack of data, we can't come to a definitive conclusion.

Recommendations

Recommendations

Design Recommendations:

1. Allow users to navigate through the onboarding screens in multiple ways.
2. Keep essential, high-value information on the first screen. Don't expect every user to swipe through each screen.
3. Keep copy short, users will not spend much time on each screen.
4. Keep the sign-up form as quick and simple as possible.

Future Analysis:

1. Complete competitive analysis of sign-up experiences.
2. Implement a test and learn approach, starting with one design as a baseline and A/B testing other approaches.
3. Analyze user data to decide the optimal number of onboarding screens.
